

GSE has delivered to Schneider Electric's new distribution center in Evreux - Guichainville

This logistics platform of 43,000 m², recently delivered, inaugurated Tuesday, 16 June.

For the realization of this building, Schneider Electric chose GSE for its recognized experience in logistics real estate and thus ensure a result that meets their quality standards in terms of design and functionality in the respect of deadlines.

GSE conducted a building certification process and obtained the high performance HQE.

In addition, GSE is committed to the control of electricity consumption and gas costs.

GSE has worked closely with the company Fives to equip the building of an automated system for preparing high capacity orders, driven by WCS TRACE®.

Finally, the building aims to be the showcase of logistics solutions from Schneider Electric.

About GSE

GSE is the benchmark for the Design and Build Turnkey Contractor business based on the complete support of construction projects (financial arrangements, land identification, technical studies, design / construction and after-sale) and contractually commits on the price, time and quality of the work. The GSE Group now has 360 employees in many countries in Europe and China. In 2014, the GSE group achieved a turnover of around 338 million euros.

About Fives
